

Amendments to the Specification

Please replace the paragraph commencing at page 9, line 18 as follows:

Referring to Figure 3, the illustrated cutter embodiment includes a first serrated cutting face surface 12 on a first side of the cutter insert 10, such as illustrated on the right side of centerline 28, and a second serrated cutting face surface on an opposing second side of the cutter insert 10, such as illustrated on the left side of centerline 28. As shown, the first and second cutting face surfaces follow curved paths within respective planes substantially parallel to the centerline of rotation.
